(b) determining from the arrival time at each location measurement unit and its distance from the transmitting transmitter the transmission time (C1, L45-67, C2, L1-34, C4, L10-45).

However, consider Kangas reference or in combination are **fails to suggest and fairly teach** (c) comparing the transmission times determined for each of the location measurement units and placing on the list only those location measurement units whose transmission times fall in a predetermined range of one another,

Claims 2-9, 12-18 are allow as being dependent to independent claims 1 and 11.
